ANNEXURE TO THE DIRECTORS' REPORT

Pursuant to Clause 49 of the Listing Agreement, a report on Management Discussion and Analysis Report is given below:

MANAGEMENT DISCUSSION AND ANALYSIS REPORT:

I. Industry structure and developments

Changing economic and business conditions, evolving consumer preferences, rapid technological innovation and adoption and globalization are creating an increasingly competitive market environment that is driving corporations to transform the manner in which they operate. Companies in this environment are now focusing even more on their core business objectives, such as revenue growth, profitability and asset efficiency.

Technology has evolved from merely driving cost efficiency. It is now also driving tangible business value. The ability to define, design, develop, implement and maintain advanced technology platforms and business solutions to address business needs has become a competitive advantage and a priority for corporations worldwide.

As a result, there is an increasing need for highly-skilled professionals in the market to help corporations transform their business, optimize operations and drive innovation by leveraging technology.

Increasing trend towards offshore technology services

Corporations are increasingly turning to offshore service providers to meet their need for higher quality and cost-competitive technology solutions. As a result, offshore service providers have become critical to the operations of many enterprises and these service providers continue to grow in recognition and sophistication. In view of this, the addressable market for offshore technology services has expanded.

The India advantage

India is widely recognized as the premier destination for offshore technology services. According to the NASSCOM Performance Review 2013, IT-BPM exports (IT services and Business Process Management) from India are estimated to grow in fiscal 2014 by 12-14%, to US \$85-87 billion. There are several key factors contributing to the growth of IT and IT-enabled services (ITES) in India and by Indian companies.

Opportunities:

The company, on a continuous basis, scans the market for scalable opportunities and has over the past twelve months identified some key areas of growth opportunities. These opportunities are in the areas of product engineering, utilities, telecom & content. The company is making concerted efforts and investments to move up the value chain in its chosen markets and acquiring new competencies and services. It includes strengthening of domain knowledge, hiring highly talented sales and marketing managers, restructuring of businesses, project management and investments in new geographies. The company is experiencing significant traction from its existing customers and is receiving several enquiries from potential customers in its chosen markets. The company continues to strengthen and build relationships with its current and prospective customers as well as its global delivery model to ensure a low total cost of ownership for the customer.

Threats

Our revenues from this business are derived in major currencies of the world while a significant portion of its costs are in Indian rupees. The exchange rate between the rupee and major currencies of the world has fluctuated significantly in recent years and may continue to fluctuate in the future. Currency fluctuations can adversely affect our revenues and gross margins. In an economic slowdown, our clients

may reduce or postpone their technology spending significantly. Reduction in spending on IT services may lower the demand for our services and negatively affect our revenues and profitability.

At an organizational level, we have a well-defined business contingency plan and disaster recovery plan to address these unforeseen events and minimize the impact on services delivered from our development centers based in India or abroad. Your company has perfect understanding of the amount of risks and extent of risks involved while delivering the project to client and knows well how to tackle them effectively. Your company is also trying to explore and find other opportunities that might prove to be beneficial in increasing our revenues and gain market share. Threat continues to be competition among companies within India and from emerging low cost destinations.

Segment wise or product wise performance:

This does not applicable to the company as the company is operating in only one segment.

Risks and concerns:

Following are some of the major risks, which the management believes form a part of the company's business and the company seriously engaged itself to mitigate them.

Financial Risks - foreign currency rate fluctuations

Business Portfolio Risks - include vertical domain concentration, service concentration, client concentrations and geographical concentration.

Legal and Statutory Risks - include contractual liabilities & statutory compliances Competition Risks - New competitors may enter the markets in which the company operates

Internal Control Systems & their adequacy:

The Management Information Systems is the back bone of our internal control mechanism. The Company has adequate internal control systems and procedures in all operational areas and at all levels equipment procurement, finance and administration marketing and personnel departments. The Company also has internal Audit system commensurate with its size and nature of business. The Audit Committee reviews the internal audit reports and the adequacy of internal controls from time to time.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by Management, as well as evaluating the overall presentation of the financial statements.

If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognized as income in the profit and loss account.
